Common water-flea. Daphnia pulex

CHAIRMAN'S FORWARD

At the end of this bulletin is a report of sightings at the GOLDEN BROOK NATURE RESERVE, BREASTON as provided by Neill Goff, the reserve warden. This is testimony to the hard work the team do at the reserve and serves to illustrate what can be seen locally.

Members will be pleased to learn that the proposed car park development at Triangle Pond, Sawley has been stopped. LENS sent a letter pointing out the importance of maintaining this site in its present form and Erewash Borough Council were unanimous in rejecting the planning application on the grounds that it would have interfered with a biologically important site.

Water seems to be retained at FORBES HOLE though no doubt the heavy rainfall in January will have contributed to this. The summer period will be the testing time and we are cautiously optimistic that water will remain at this Grade 1 site.

The society is preparing for its survey of TROWELL MARSH nature reserve during the spring and summer of this year and a plan of the site is included with this bulletin for the convenience of any member wishing to visit the site on their own. Time has been allocated in the Summer Programme for the survey but it is hoped that as many as possible will visit the site at times other than these and report their findings.

Finally, I hope that my recently acquired Bat Detector will help to throw some light in bat populations locally. Following the talk given to LENS by Alan Wragg about 'Bats' I felt this instrument would be a useful investment.

Thanks are extended to all for their continued support.

Alan Heath

REPORTS

COURTAULD'S NATURE RESERVE, Spondon - Jeanette Rhodes

Twelve members visited the reserve on the 14th July 1997. It was a fine evening and we were met by the Public Relations Officer. He gave a short introductory talk on the work of the Courtauld plant.

The reserve itself was not accessible on the far side so the birds which nest there have complete isolation. There were two hides which afforded a very good view of both ends of the lakes. Water is drawn from the lakes and is circulated for cooling purposes. As we watched we were delighted to see a kingfisher which showed itself for some considerable time.

BIRD RECORD

John & Judy Langford

The following is a report of BLACKCAP as seen in the garden of 114 Breedon Street, Long Eaton.

November 1997: One female Blackcap seen on the 11th.

December 1997: One male seen on the 4th and again on

the 5th.

January 1998 : One male seen on the 11th, 12th, 13th,

15th and 21st.

* * * * * * * * * * * * * * * *

BIRD RECORD

Max Bryce

Four Bean Geese were recorded at Trent Meadows at the end of January 1998

One male and one female Siskin seen in the garden at 205 Tamworth Road, Long Eaton on the 17th and 18th February 1998. This is a first sighting of this bird at this location.

FORBES HOLE :

Only two samples obtained from the Main Pond and one from the Small Pond on March 17 before it dried up in the summer. See Special Report.

TICKNALL

Visit on May 26 when sample taken from Zeta

Pool and Omega Pool.

TRIANGLE POND - SAWLEY:

One visit with samples taken on August 18 with Lynn Winfield following

her Open University study.

* * * * * * * * * * * *

TICKNALL: List from both ponds -

Daphnia obtasa, Culex larva, Cyclops, Cypris, Ascellus, Chironomid larva, Caddis larva, Dragonfly larva, Cloeon nymph, Green Lestres larva, Gammarus, Peashell, Simocephalus, Diaptomus, Potomopyrgus jenkensii, Cladorphora, Corixa

Pinnularia, Oscillatoria, Bursaria, Nematode, Cymbella ehrenbergii, Spirogyra, Pleurosigma, Campylodiscus, Rotifer sp.

TRIANGLE POND: List from two sites -

Cleon nymph, Scapheloberis, Diaptomus, Eurycercus, Daphnia sp., Cypris, Cyclops, Limnesia sp., Hydracarina

Pandorina, Loxophyllum, Vorticella, Spirostomum, Pleurosigma, Synedra, Cymbella ehrenbergii, Fragellaria, Asterionella, Nitzschi: sigmoidea, Bacillaria paradoxa, Cymbella gastroides,

Pinnularia.

Species recorded by Mrs Lynn Winfield have been placed in the Long Eaton Natural History Society records.

We were successful in stopping development at this pond.

Compared to the comment of the comme	·丁丁丁二次 乙克州 其四九十 年前 丁	and the state of t		TO THE STATE OF TH

NOTE

The above is from only two samples and has been compared with only one sample last year. This is hardly a fair comparison but the lack of samples has been due to water loss at the pond. It is being used to try to assess the extent of return of species.

Note the apparent absence of Diaptomus, and Daphnia

Water level estimated about two feet at the end of the year and it is hoped it will remain.

SMALL POND: This pond more or less dried up during the year and the following list was from a single sample on March 17

Cyclops, O; Daphnia hyalina - O; Diaptomus - VR; Chydorus - VR; Fragellaria - VR; Arcella - R; Pinnularia - VR; Nitzschia sigmoidea - VR; Oscillatoria - VR; Rotifer sp. VR; Cymbella ehrenbergii - R

WEATHER SUMMARY 1997 - Alan	Heath
PREVAILING WIND LEAST WIND WARMEST DAY	- WEST - SOUTH-EAST - August 10 88°F
COLDEST DAY	- Jan 3 and Oct 29 both at 23 F
WETTEST DAY	- July 9 with 23.8mm in thunderstorm and
WETTEST MONTH DRIEST MONTH DAYS WITH OVER INCH OF RAIN IN 24 HRS. TOTAL THUNDERSTORMS TOTAL RAIN	included hail - June - March - none - 5 - 22.42 inches (569.6mm which equals 0.43 ins per week
TOTAL DRY DAYS + NIGHTS TOTAL WET DAYS + NIGHTS	7 – 501 – 229
TOTAL SNOW (Level in inches)	- 1½ ins
DAYS WITH NEW SNOW ON GROUND TOTAL FOG	- 3
FOG ALL DAY	- 8
BAROMETER Max. Min.	- 1 - 30.9 on Jan 28 and 29
STRONG WIND/GALES	- 28.9 on Feb 24 - 4 Feb 19 and 20 and bec 24 and 25
AVERAGE MAXIMUM TEMPERATURE	- 68.8 F
AVERAGE MINIMUM TEMPERATURE	- 34·25 F
DAYS WITH TEMPERATURES OF 80°F OR MORE	- 20 there being 6 in July and 14 in Aug.
DAYS WITH TEMPERATURES OF 32°F OR LESS	- 34 there being 12 in Jan, 3 in Feb, 3 in Mar, 2 in Apr 7 in Oct, 4 in Nov and 3 in Dec.

NOTES: Rainfall was approximately 2 inches below average but was 3 inches up on the previous year.

June was very wet with only 1982 and 1985 having more locally since records started here in 1960. June total more than the whole summer last year (June to September)

RELOCATION OF WEATHER STATION

From 18th June 1997, the Weather station was moved to 6 Harlaxton Drive, LONG EATON, Nottingham NG10 2ER.

NAT. GRID. REF. 501/341 52° 54' 03" N

10 15' 18" W

There was no loss of records as the change over was smooth and rapid.
